HON. A. R. PATRICK
MINISTER

J. E. OBERHOLTZER
DEPUTY MINISTER

EDMONTON • ALBERTA • CANADA

Edmonton, Alberta,
September 1, 1959.

This Directory of Alberta manufacturers and Alberta manufactured products is presented to you with the compliments of the Department of Industry and Development.

Your attention is directed particularly to the wide range of manufactured and semi-manufactured products now produced in this province. Many of these are, in themselves, indicative of the opportunities which exist for further processing and manufacturing.

The Alberta and the western Canadian markets are expanding rapidly and have now reached a size economically to justify local production. In addition, measures are being taken to advertize the merits of supporting local industries.

You are invited to take advantage of the services offered by my Department for investigating industrial opportunities in Alberta.

A handwritten signature in cursive script, reading "A. R. Patrick". The ink is dark and the signature is fluid.

Hon. A. R. Patrick, Minister,
Department of Industry and Development

A campaign to promote the sale of Alberta made goods has been instituted by the Alberta Government. The stylized replica of the Alberta floral emblem, the wild rose, shown above, has been chosen as the symbol identifying products manufactured in Alberta.

Alberta manufacturers and producers are encouraged to display this emblem on their products. The important role played by the industries of the province will be emphasized. It is hoped that consumers will realize the wide range of Alberta made products and that they will support local industry by purchasing these products.

Wholehearted co-operation in this programme by producers and consumers alike will be mutually beneficial. It will result in expansion of existing industries, in further industrialization, and in a sounder economy for all citizens of the province.

The following list is more detailed than that found in the directory of firms and has been compiled to show, wherever possible, the dollar volume of products manufactured. The Statistics Act precludes the publication of figures, either quantity or value, if the specific product is manufactured by less than three firms. An asterisk in the value column indicates items affected by this regulation. Quantities and valuations shown are minimum, since not all firms report in detail.

ALPHABETICAL LIST OF MATERIALS AND SUPPLIES

USED BY MANUFACTURING FIRMS OF ALBERTA

1 9 5 7

The following is a list of materials and supplies used by Alberta manufacturing firms in 1957. The list is not complete. Some items of small value have been omitted. Some firms failed to submit detailed lists of materials used. The figures presented as to quantity and value will therefore be, in every case, minimum figures.

The Statistics Act precludes the publication of figures, either quantity or value, if the specific item is used by less than three firms. An asterisk in the value column indicates items affected by this regulation.
